

CHOCO DE LUXE PROJECT PRESENTATION

BY OPEYEMI OLANIRAN

INTRODUCTION

Choco de Luxe is a premium artisanal chocolate brand headquartered in Brussels, Belgium, with operations across several European cities. The company distributes its chocolate bars, bites, and confections through multiple channels; retail outlets, online platforms, and supermarkets.

With a growing product line and expanding footprint across Europe, they aim to maintain high-quality standards while increasing market share, and adapting its product and sales strategy based on regional performance and customer preferences.

BUSINESS PROBLEM

While Choco de Luxe boasts strong product quality and market presence, it currently lacks a centralized, data-driven understanding of performance across its European operations.

Leadership is particularly focused on addressing three key challenges:

- Identifying and improving underperforming cities
- Resolving inconsistencies in delivery efficiency
- Realigning pricing, promotion, and product mix to better match evolving customer preferences

To move forward, the team requires actionable insights that will empower smarter sales strategies, streamline logistics, and strengthen regional market impact.

AIM OF THE PROJECT

- To analyze Choco de Luxe's sales performance across various locations, sales channels, and product lines.
- Identifying patterns, inefficiencies, workforce and growth opportunities
- Produce interactive Tableau dashboards to help business leaders make informed decisions on product positioning and channel strategy

OVERALL BUSINESS PERFORMANCE

Choco de luxe Analytic Report

Total Products	Total Profit	Profit margin	Completed transactions	Cancelled transactions	Locations	Total Expenses	Total Qty Sold
21	€2.36M	46%	1,046	48	7	€ 2.77M	177,007

TRANSACTIONS OVER TIME

REVENUE OVER TIME

The business performance over 2 years (2022 and 2023) are as follows:

- Total Profit: €2.36M
- Profit Margin: 46%
- Total Quantity Sold: 177,007 units
- Total Expenses: €2.77M

Despite a high margin, expenses outweigh profit — indicating either inefficiencies in pricing or in delivery and promotions.

- Completed Transactions: 1,046 ; highest was in June 2023 (91) and lowest in August 2022 (41)

- Cancelled Transactions: 48

Cancelled Transactions across 7 locations may indicate delivery inefficiencies or customer dissatisfaction.

No Transactions were made between August 2022 and January 2023.

YEARLY BUSINESS PERFORMANCE

21	€1.40M	46%	609	9	7	€ 1.64M	102,444

TRANSACTIONS OVER TIME

REVENUE OVER TIME

In 2023, Choco de Luxe saw a notable upswing in performance, with **total quantity sold** rising from **74,563 in 2022 to 102,444 units**.

This growth contributed to an increase in **total profit** from approximately **€960K to €1.40M**. Additionally, the number of cancelled transactions dropped significantly—from 39 to just 9 — and completed transactions rose from 437 to 609 reflecting improved customer experience and operational efficiency across all locations.

SALES ANALYSIS

SALES CHANNEL DYNAMICS

The Website emerges as the most efficient sales channel, leading in both transaction volume and **total profit (€1.07M)**. Representing around 45% of all transactions (496) with just 23 cancellations, it reflects strong digital traction and a clear preference for online shopping among consumers.

The Warehouse channel, while showing moderate transaction volume, delivers a high profit per order—likely attributed to bulk orders and wholesale pricing strategies. In contrast, Social Media matches the Warehouse in terms of transaction volume but lags slightly in overall profitability. This suggests strong customer engagement, though lower margins may result from promotional discounts or a focus on lower-cost products.

SALESPERSON PERFORMANCE

TOP PERFORMERS

Karlen McCaffrey stands out as the top performer, generating **€126K in profit** from 45 transactions, followed closely by **Beverie Moffet (€121K)** and **Oby Sorrel (€119K)**, demonstrating consistently strong performance among the top-tier sellers.

Notably, ten salespeople surpassed the €100K mark, highlighting strong individual performance across the team.

Kelci Walkden and Brien Boise recorded over 50 transactions each but delivered slightly lower profit suggesting a high-volume, lower-margin approach. In contrast, **Jan Morforth** secured €110K from just 39 transactions, indicating either a potential focus on premium sales or more effective margin optimization.

SALESPERSON PERFORMANCE

UNDER PERFORMERS

Most salespeople completed between 35 and 45 transactions, yet profits ranged from €55K to €99K—falling short of the €100K target. **Madelene Upcott** came closest, generating **€99K** from 43 sales, just under the benchmark. At the lower end, **Wilone O'Kielt** and **Rafaelita Blaksland** each logged 34 transactions but earned just €55K and €59K, respectively.

Notably, Camilla Castle achieved €67K in profit from only 29 transactions, suggesting a higher average deal value compared to colleagues with more sales but similar returns. Meanwhile, Gigi Bohling recorded the highest transaction count (46) but delivered only €86K in profit, hinting at a low-margin sales strategy.

These trends highlight that transaction volume alone isn't driving profitability—pointing instead to possible issues with pricing strategy, discounting, or product mix.

REGIONAL PERFORMANCE

Across Europe, delivery success and sales volume data reveal a mix of operational strengths and market development opportunities

- Lyon boasts a flawless 100% delivery success rate, yet its relatively low sales volume (11,403 units) from 69 transactions suggests untapped potential.
- Zurich demonstrates near-perfect delivery efficiency (99%) and solid sales volume (22,731 units) from 136 transactions, positioning it as a benchmark city for operational excellence.
- Barcelona & Turin combine high demand (33K+ units sold) with strong delivery performance (96–97%). Their balance of volume and reliability supports aggressive growth strategies.
- Amsterdam delivers 32,395 units from 193 transactions with a 95% success rate, indicating strong performance and room for deeper engagement.
- Hamburg & Brussels maintain consistent delivery success (93%) and moderate sales volumes (~21K units). While operationally sound, these cities lag behind top-tier performers.

REGIONAL PERFORMANCE

Regional Revenue & Profit Analysis

- **Turin** leads in both **revenue and profit**, signaling deep market penetration and operational efficiency. Revenue: €1.01M | Profit: ~€500K
- Barcelona- Revenue: €969K | Profit: ~€450K- indicates a high-performing and stable market with strong customer demand and healthy margins.
- Amsterdam-Revenue: €925K | Profit: ~€450K- this points to effective digital engagement and logistics infrastructure
- Zurich-Revenue: €677K | Profit: ~€350K. High delivery success yet comparatively lower profit indicates possible inefficiencies or high local operating costs.
- Brussels & Hamburg-Revenue: ~€600K | Profit: ~€300K
- Lyon-Revenue: €358K | Profit: ~€150K. Underperforming in both revenue and profit; likely an emerging or constrained market.

RECOMMENDATIONS

Sales Channel Optimization

1. Website Enhancement

Tailor product recommendations based on user web behavior and browsing patterns.
Launch seasonal bundles or loyalty rewards and run targeted promotions to encourage repeat purchases and boost retention.

2. Digital Performance Audit & Relaunch

Conduct a full audit of technical performance, cart abandonment trends, and recent campaign effectiveness.
Relaunch with time-sensitive promotions or referral programs to reengage online customers.

3. Operational Efficiency

Optimize order fulfillment by streamlining logistics.
Explore regional warehousing to shorten delivery times and lower costs.

RECOMMENDATIONS

Salesperson Performance Enablement

1. Targeted Coaching & Peer Learning

Pair high-efficiency reps (e.g. Karlen McCaffrey) with high-volume but lower-profit peers (e.g., Gigi) for structured knowledge exchange and mentorship.

Encourage regular best practices workshops across the team.

2. Deal-Level Visibility

Provide reps with dashboards that show real-time deal profitability.

Train teams to identify and prioritize high-margin upselling opportunities.

3. Profit-Based Incentives

Redesign compensation structures to reward profit generated—not just volume.

Create tiered incentives based on product margins to align rep behavior with business profitability.

4. Sales Mix Optimization

Audit underperforming reps' product portfolios to assess if they are favoring low-margin items.

Adjust sales scripts or coaching materials to guide them toward higher-margin alternatives.

RECOMMENDATIONS

Regional sales optimization

- Use Turin's operational excellence as a reference point for optimizing performance in lower-performing markets. Replicate its successful strategies in cities with similar demographics and infrastructure.
- Sustain growth in mature markets by reinforcing customer loyalty through tailored retention programs and incentive-driven initiatives.
- In high-profit markets like Amsterdam, deepen competitive advantage by enhancing digital engagement and elevating the overall customer experience.
- In cities like Zurich, where delivery reliability is strong but margins lag, review cost structures and explore automation or strategic local partnerships to boost profitability.
- In underperforming regions, accelerate market penetration through focused brand-building and targeted marketing efforts.
- Identify and address market-specific growth barriers through in-depth analysis. Drive demand with localized outreach, innovative campaigns, and differentiated service offerings.

PRODUCT ANALYSIS

PRODUCT PERFORMANCE BY SALES CHANNEL

Inorganic Products– Total Profit: €1.97M

- Top Channel: Website (€887K), followed by Social Media (€555K) and Warehouse (€532K). Inorganic products dominate profitability, especially through the Website channel.

Organic Products– Total Profit: €384K

- Top Channel: Website (€187K), followed by Warehouse (€137K) and Social Media (€61K). Organic products represent a small fraction of total profit with lower performance across all channels. However, the Website still leads, indicating potential for targeted growth.

PRODUCT ANALYSIS

Product & Category Margin Contribution			
Product Name	Category	Total Profit	% Margin Contribution
Eclairs	Caramel Centers	€184,414	45.54%
99% Dark & Pure	Dark Chocolate	€143,143	21.62%
Milk Choco	Dark Chocolate	€136,012	20.70%
Caramel Stuffed Bars	Filled Chocolate	€134,426	19.32%
Peanut Butter Cubes	Filled Chocolate	€122,235	22.54%
Spicy Special Slims	Flavored Chocolate	€119,997	23.00%
70% Dark Bites	Dark Chocolate	€113,752	18.86%
85% Dark Bars	Dark Chocolate	€113,199	21.16%
Smooth Silky Salty	Milk Chocolate	€112,983	26.68%
Fruit & Nut Bars	Nut Chocolate	€109,560	22.54%
50% Dark Bites	Dark Chocolate	€109,398	25.76%
After Nines	Milk Chocolate	€107,668	21.16%

Raspberry Choco	Fruit Chocolate	€101,347	20.70%
Milk Bars	Milk Chocolate	€99,627	22.54%
White Choc	White Chocolate	€98,453	25.76%
Almond Choco	Nut Chocolate	€97,122	20.70%
Orange Choco	Fruit Chocolate	€93,687	20.24%
Baker's Choco	Milk Chocolate	€86,244	18.40%
Drinking Cocs	Drinking Chocolate	€85,787	24.84%
Choco Coated Almonds	Nut Chocolate	€84,456	17.02%

PRODUCT ANALYSIS

PRODUCT- LEVEL PROFITABILITY

High-Margin contributors

- Eclairs (Caramel Centers) lead with the highest margin contribution at 45.54% and a strong profit of €184K.
- White Choc and 50% Dark Bites also show impressive margins (25.76%) with solid profit figures (~€98K–€109K).
- Drinking Coco and Smooth Silky Salty offer margins above 24%, suggesting strong value propositions in niche categories.
- Dark Chocolate products like 99% Dark & Pure, Mank Choco, and 85% Dark Bars contribute consistently to profit (~€113K–€143K) with margins around 20–22%.
- Milk Chocolate items such as After Nines and Milk Bars maintain healthy margins (~21–22%) and profit levels (~€99K–€107K).

Lower Margin Contributors

- Choco Coated Almonds and Baker's Choco have the lowest margin contributions (17.02% and 18.40%) despite moderate profits.

RECOMMENDATIONS

Organic Product Strategy

- Bundle organic items with high-margin inorganic products to improve visibility and encourage trial.
- Launch limited-edition organic flavors inspired by trending ingredients
- Expand organic and clean-label assortments in categories that align with evolving consumer preferences.
- Highlight organic selections prominently in homepage banners, loyalty tiers, and product bundles.

Promotional Tactics

- Prioritize high-margin products in promotional campaigns, loyalty initiatives, and premium packaging.
- Leverage seasonal promotions and high-volume events to drive awareness and sales of core product lines.
- Create targeted campaigns for organic offerings using behavioral insights to personalize content and timing.

RECOMMENDATIONS

Engagement & Awareness

- Collaborate with eco-conscious influencers to elevate organic product storytelling.
- Run interactive promotions—like polls, giveaways, or user-generated content challenges—to spark organic engagement.
- Test short-form video formats that showcase sourcing transparency, health benefits, and lifestyle fit.

Sales Channels & Bundling

- Offer bulk purchase incentives and curated subscription boxes featuring organic selections.
- Audit cost structures on low-margin products and consider reformulating, repricing, or repositioning to maximize ROI.
